## EDUCATION

### High School

*Afşin Science High School*  
2016-2020

### University

*Muğla Sıtkı Koçman University*  
2021-2026

## SKILLS

- Python
- Java
- C#
- Unity
- Team Organization
- SQL
- API
- Bash Script

## PROFILE

I am a **Computer Engineering student** open to learning. I am in the undergraduate program at Muğla Sıtkı Koçman University. I expect to graduate in June 2026.

I am an active member of the **Siber Vatan** program and I am actively receiving specialized training in cybersecurity.

Additionally, as an active scholar of the **Google Game and Application Academy**, I am receiving training to develop **AI-based** games.

Lastly, I am a member of the "Axtro Team" competing actively in the **Model Satellite** category at **Teknofest**, where I am responsible for *data transmission* and *satellite software*.

I am proficient in **Python** at an advanced level, and have intermediate to advanced proficiency in **Java** and **C#**.

## EXPERIENCE

- My friend and I participated in the **BTK-Datathon 2023**, where we developed an **AI model** and had the opportunity to enter the **top 10** teams.
- In the **Ideathon 2024** competition held within the **Google Game and Application Academy**, our team **placed 2nd**. I have had the opportunity to participate in multiple Game Jams.
- After completing the training process at the *Technopark* through the *Güney Ege Kalkınma Ajansı*, my friend and I **developed an application** and presented it at the Atatürk Cultural Center.
- I am actively improving myself in the field of cybersecurity by participating in various competitions and **CTFs** under the umbrella of **Siber Vatan**.
